

Institution Name: Cooper University Hospital/Cooper Medical School of Rowan University Female Pelvic Medicine and Reconstructive Surgery

Address: 3 Cooper Plaza, Suite 221, Camden, NJ 08103
Telephone: +1-856-342-3006
E-mail: Maziarz-Dawn@cooperhealth.edu or echols-karolynn@cooperhealth.edu

Program Director: Karolynn Echols, MD, FACOG, FPMRS
Program Faculty: Karolynn Echols, MD, Fellowship Director FPMRS; Ricardo Caraballo, MD, Associate Fellowship Director FPMRS; Adam Holzberg, MD, Division Head FPMRS.

Trainees Per Year: 3
Program Length: 3 Years for Ob/Gyn residency, 2 years for urology residency

Specialty Certification: ABOG
Special Interest Areas: Prolapse, incontinence, defecatory disorders, grafts in vaginal reconstruction, vaginal surgery, genitourinary fistula, simulation, alternative therapies in Urogynecology, global medicine, cosmetic gynecology and basic science research in Urogynecology.

Program Description: Our program provides our fellows during their three-year training with a multidisciplinary approach to training in pelvic floor disorders including urinary and fecal incontinence, other benign bladder disorders, pelvic organ prolapse, pelvic floor dysfunction, female sexual medicine, congenital anomalies, cosmetic gynecology as well as the requisite investigative and scholarly skills, to begin a career in academic FPMRS. Surgical education includes a balance of vaginal and abdominal, laparoscopic and robotic techniques. Fellows have the opportunity to pursue their FPMRS interests in global medicine as there are ample opportunities for international health electives including Jamaica, Ghana, and Rwanda. Unique opportunities include a laparoscopic dry lab, exposure to the robotic simulator, and collaborative research opportunities with Cooper University Hospital and Cooper Medical School of Rowan University clinicians and basic scientists. Our division's faculty is well respected nationally for their skills in vaginal reconstructive surgery and they are considered key opinion leaders in their field. They

are all founders of international mission organizations that provide much needed care to women around the world. Former fellows have had the opportunity to provide mission work around the world and these numerous unique opportunities continue to enhance our program.
